

Champrix – Your partner in feed solutions

Champrix feed solutions

Champrix delivers a wide range of premixes, feed additives, milk replacers and protein concentrates that we will carefully tailor to your needs. Champrix feed is suitable for all kinds of animals, from ruminants to poultry and we deliver to the animal compound industry, home-mixers, feed products, integrators and distributors worldwide. Having Rotterdam International Harbour within our proximity provides us with cost efficient global distribution possibilities. If desired, we can even compose a shipping of more than one product in one container.

Our goal is your success

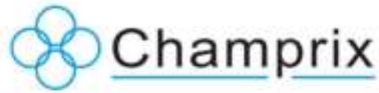

Our thoroughly experienced team is dedicated to find the best possible products for your needs. We strive to be your reliable and knowledgeable partner and we work hard and fast to deliver our products anywhere in the world with a hands-on mentality. We are fully committed to develop the best balance between optimal quality and competitive prices and we are dedicated to the innovation of existing and new products.

Premium quality nutritional products and services

Our products are geared towards animal gut health and efficient digestion resulting in better growth, health and productivity of animals. We are GMP+ certified and our products are regularly tested by renowned and independent laboratories. It is our goal to achieve optimal feed-to-food conversion for our clients and therefore all our products can be customized to your needs. Our team of knowledgeable people is here to help you find solution that fit your requirements and your business.

Champrix – The best results start with the right partner

Premixes

Champrix vitamin and mineral premixes are suitable for all kinds of animals and available in all inclusion rates from 0,01% up to 2,5% of the complete feed. Premixes are the answer for completing your complete feed ration with the best ratio of essential vitamins and minerals. Investment in the right premix for your broiler and layer diets will pay off in improved bird quality, less mortality and improved farm performance and thereby higher return on investment!

Concentrates

Champrix concentrates are suitable for all kinds of animals and available in all inclusion rates from 2,5% up to 35% of the complete feed. Champrix concentrates are practical in application and made from the highest quality raw materials available, including amino acids antioxidants, anti-moulds and production/efficiency improving feed additives

Prestarter complete feed

A good start is essential for the lifetime production of the animal. Prestarter feed stimulates feed intake from the first hours onwards, prepares for future growth, improves in the support of the immune system and decreases mortality.

NaPo – Chick prestarter complete feed

NoVo – Pig creep feed for the best start

Champrix specialties and feed additives

Feed costs can be up to 70% of the total livestock production expenses, therefore feed spoilage and health problems of the livestock could lead up to serious economic losses for the farmer. Champrix can advise a suitable solution for these problems with the right feed additives as preventive aid.

Vitaprix – Watersoluble vitamins

Champ-Green – Mix of essential oils

Heat-Champ – The best nutritional solution for heat-stressed birds to regain feed intake

Acidifiers

Champ-Acid is the most promising dietary approach to reduce effects of bacterial imbalance.

Champ-Acid Standard, Plus, Advanced and Liquid are the acidifiers to improve feed efficiency and control pathogenic pressure for a more healthy gut flora, efficient nutrient utilization by the animal, and absence of digestion disorders.

Toxin binders

Mould and yeast spoilage of feed and mycotoxins have a direct negative influence on the health and production performance of animals. Champrix offers the following mycotoxin binders: **Champ-Tox Standard, Plus, Advanced and Premium** for different degrees of mould and yeast infection.

Milk replacers

Healthy animal rearing in the first months of life has a considerable impact on growth, weaning age and ultimate production. The supply of a high quality milk replacer to rearing animals is therefore key and needs precise management.

Champlac Calf Milk Replacers, Lamb Milk Replacers and Sow Milk Replacers are your solution to a sustainable production life and increased revenue!
