

How to use 123FEED.com

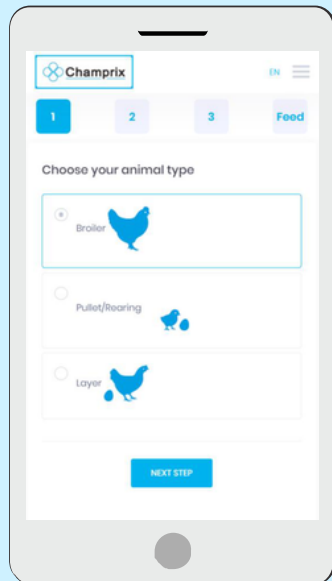

Use the steps below to create your optimal feed recipe in a few simple actions.

Step 1. Select animal type

Select your animal type to begin.

Then click 'Next step' at the bottom of the page or select step '2'.

Click here 

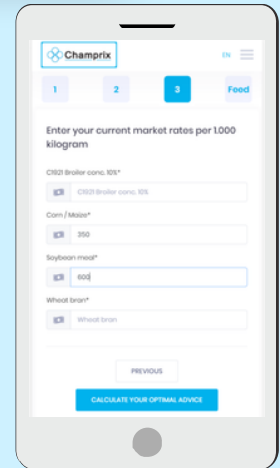

Step 3. Prices

In this step, set your current price per kilogram.

Enter prices in your preferred currency.

Make sure all values use the same unit, for example per 1,000 kg.

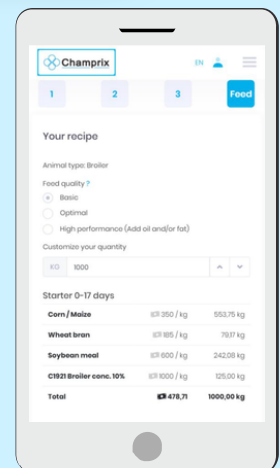

Result. Feed

In this step, you can view your optimal recipe.

The recipe is divided into phases, aligned with the chicken's life stages.

The default quality is set to Basic. You can switch to Optimal or High Performance to match your desired quality.

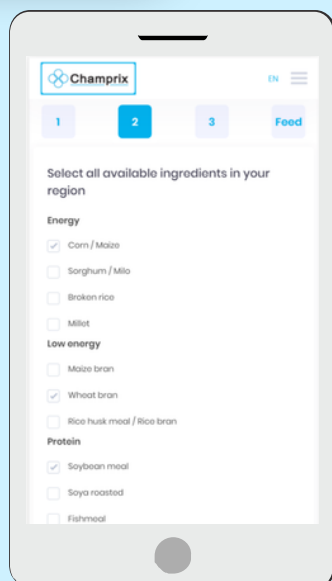

Step 2. Select ingredients

In this step, select the available ingredients.

Mark all ingredients available in your region.

You must select at least one high-energy product and one premix or concentrate.

Adding more ingredients can reduce the cost of your recipe.
